

19. Non-Fiction – Science

MIND INTO MATTER by Fred Alan Wolf

Alchemists of old attempted to make sense of the universe – to discover the connection between mind and matter. Some of today's scientists, in particular quantum physicists, are doing the same. In his latest contribution to the study of consciousness, physicist Fred Alan Wolf reveals what he calls the *new alchemy* – a melding of the ideas of the old alchemists and the new scientists to reach a fuller understanding of mind and matter. Ultimately, Dr. Wolf explains the process by which the information of our minds transforms into the matter of our physical world.

An elegant book with short, stand-alone chapters, each framed by an alchemical symbol and its definition.

You may remember him as the resident physicist on the Discovery Channel's *The Know Zone*. You may have seen him on the PBS series, *Closer to Truth*, or speaking at the Whole Life Expo, Vision Quest, the Holmes Institute, or the Institute of Noetic Sciences. You may have read one of his ten groundbreaking books. Wherever you may have encountered Dr. Fred Alan Wolf, it's certain you've come away feeling that your mind and your world have been expanded. Respected among scientists and lay people alike for his pioneering work combining scientific and spiritual thought, he is, as Deepak Chopra says, "one of the most important pioneers in the field of consciousness."
